

Severe Weather Advisory

26/08/2020

Hurricane Laura

Location: Gulf of Mexico

Impact: Marine exposure; Offshore and Energy exposure

Issued by Skytek: at 12:00 GMT on 26/08/2020

Summary: Hurricane "Laura" has rapidly intensified, fueled by the warm waters of the Gulf. The NHC warns that Hurricane "Laura" is expected to be a significant Hurricane Category 3, possibly 4. Landfall is currently predicted to be on the border between Louisiana and Texas, on 27th Aug early AM.

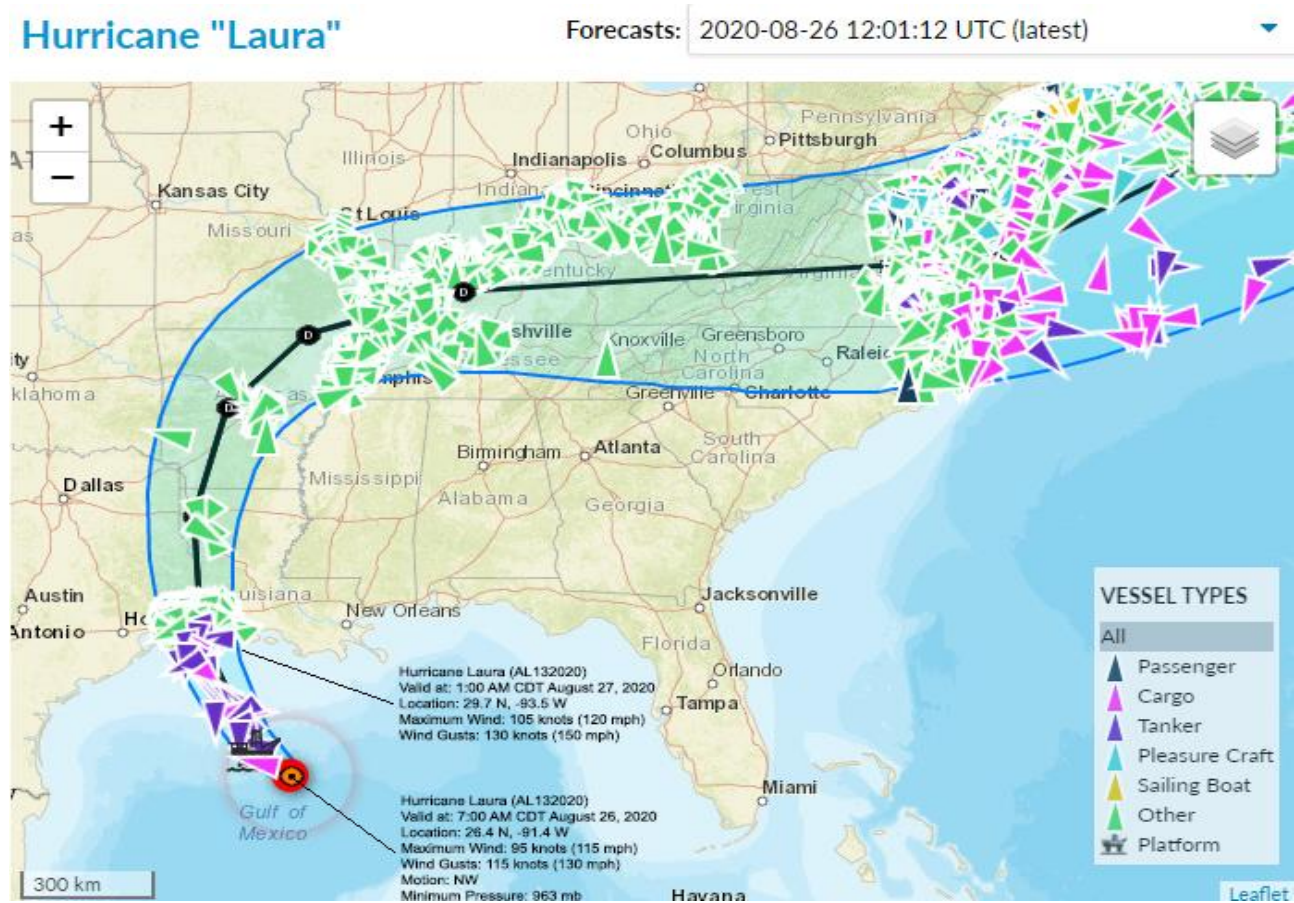

Figure 1 - Skytek analyses of the marine exposure in the cone of Hurricane "Laura" on 26th Aug 2020

Skytek's risk management system, REACT is currently tracking a total of 2,750 ships in the area of the storm cone.

Of this number, some 400 are bluewater cargo carriers. A sizeable percentage of the remainder, 915 are tug boats engaged in inland traffic.

All of the highlighted assets are capable of valuation.

In addition to ocean traffic, Skytek is also capturing offshore structures.

Skytek's REACT system is currently tracking 533 offshore energy assets of estimated exposed value \$54 billion, and 81 windfarms of an estimated exposed value of \$1.7 billion. REACT system capabilities extend to placing detailed valuations on each structure, individually and collectively.

Skytek will also be tracking potential storm activity in the concentrated refining & petrochemical facilities in the storm cone. We will, if required, be in a position to offer real time, pre and post, storm analysis.
